07.computed

学习要点：

1.computed

本节课我们来要了解一下 Vue3.x 中的计算属性 computed 用法；

一．computed

1. computed 是组合式 API 中的计算属性的功能，和传统式基本一致；

```
const count = ref(1)
//const myCount = computed(() => count.value)
const myCount = computed(() => {
    return count.value
})

// getter,setter
const yourCount = computed({
    get : () => 'count:' + count.value,
    set : (val) => {
        count.value = val
    }
})

yourCount.value = 10

return {
    myCount,
    yourCount
}
```
